	WILLIS, Peter	1952	Palm Beach, Fla.	Local Campus Newsman-ann.	

Pat:

Here is as complete a list of the information you requested as I have at present. It is somewhat incomplete in some departments, but I think it is complete enough for general publicity purposes. I'm sorry that I am unable to give you any data on personnel involved in the WRTC network disc, but arrangements are still incomplete at this time. Also please excuse the typing as it is pure newspaper grade work.

Bob J.

1. The first part of the report is a general statement of the work done during the year. It includes a summary of the results of the various experiments and a comparison of these results with those obtained in previous years. The second part of the report is a detailed description of the work done during the year. It includes a description of the apparatus used, a description of the methods used, and a description of the results obtained. The third part of the report is a discussion of the results obtained. It includes a discussion of the significance of the results and a discussion of the limitations of the work. The fourth part of the report is a conclusion. It includes a summary of the main results and a statement of the conclusions drawn from these results.

The work done during the year has been of a general nature. It has been aimed at obtaining a better understanding of the properties of the various substances used in the experiments. The results obtained have been of a general nature. They have shown that the properties of the various substances are in general in accordance with the results obtained in previous years. The work done during the year has been of a general nature. It has been aimed at obtaining a better understanding of the properties of the various substances used in the experiments. The results obtained have been of a general nature. They have shown that the properties of the various substances are in general in accordance with the results obtained in previous years.
